

# Reasoning and Problem Solving

## Step 11: Negative Numbers

### National Curriculum Objectives:

Mathematics Year 5: (5N5) [Interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero](#)

### Differentiation:

Questions 1, 4 and 7 (Reasoning)

**Developing** Identify incorrect calculations when using negative numbers in context to -10. Including number lines with marked scales with marked increments.

**Expected** Identify incorrect calculations when using negative numbers to -50. Including marked and unmarked number lines, with some increments given and the same start and end points e.g. -10 to 10.

**Greater Depth** Identify incorrect calculations when using negative numbers to -50. Including marked and unmarked number lines, where increments are greater than 1 and the start and end points are different e.g. -30 to 20.

Questions 2, 5 and 8 (Reasoning)

**Developing** Identify the halfway point between two numbers using their understanding of negative numbers in context to -10. Including number lines with marked scales with marked increments.

**Expected** Identify the halfway point between two numbers using their understanding of negative numbers to -50. Including marked and unmarked number lines, with some increments given and the same start and end points e.g. -10 to 10.

**Greater Depth** Identify the halfway point between two numbers using their understanding of negative numbers to -50. Including marked and unmarked number lines, where increments are greater than 1 and the start and end points are different e.g. -30 to 20.

Questions 3, 6 and 9 (Problem Solving)

**Developing** Solve problems using negative numbers to -10. Number lines with marked scales with marked increments given for support.

**Expected** Solve two-step problems using negative numbers to -50. Marked and unmarked number lines given for support, with some increments given and the same start and end points e.g. -10 to 10.

**Greater Depth** Solve multi-step problems using negative numbers to -50. Marked and unmarked number lines given for support, where the start and end points are different e.g. -30 to 20.

## Negative Numbers

## Negative Numbers

1a. Jo has recorded each answer to the questions below on the number line.

A. 6 more than -9

B. 5 subtract 14

Is she correct? Explain your answer.

R

1b. Bert has recorded each answer to the questions below on the number line.

A. 3 subtract 9

B. 8 more than -4

Is he correct? Explain your answer.

R

2a. Arty thinks that the number that lies halfway between A and B is 0.

Is he correct? Prove it.

R

2b. Punita thinks that the number that lies halfway between A and B is 0.

Is she correct? Prove it.

R

3a. Isabel had £5 in her bank account. She spent £13 in the shop and she is now overdrawn. How much money does Isabel have in her bank account now?

Use the number line below for support.

PS

3b. Sinead had £6 in her account. She paid her phone bill online but now she is overdrawn by £9. How much was her phone bill?

Use the number line below for support.

PS

## Negative Numbers

4a. Andy has recorded each answer to the questions below on the number line.

A. 14 more than negative 23

B. Sixteen less than three

C. 15 subtract 42

Is he correct? Explain your answer.

R

## Negative Numbers

4b. Betty has recorded each answer to the questions below on the number line.

A. Fifteen less than seven

B. 4 more than negative 13

C. The difference between 5 and -4

Is she correct? Explain your answer.

R

5a. Hannah thinks that the number that lies halfway between A and B is 0.

Is she correct? Prove it.

R

5b. Avneet thinks that the number that lies halfway between A and B is 2.

Is he correct? Prove it.

R

6a. Ben had £28 in his bank account. On Tuesday, his phone and broadband bills came out. His bank account is now -£16. If the phone bill was £25, how much was Ben's electricity bill?

Use the number line below for support.

PS

6b. Hanin had £23 in her bank account. On Wednesday, she spent £16. On Thursday, she paid a £22 electricity bill. How much money does Hanin have in her bank account now?

Use the number line below for support.

PS

## Negative Numbers

7a. Ellie has recorded each answer to the questions below on the number line.

A. The difference between 2 and -8

B. 14 more than negative 32

C. Twenty-eight less than six

Is she correct? Explain your answer.

R

## Negative Numbers

7b. Brian has recorded each answer to the questions below on the number line.

A. Thirty-six less than eight

B. The difference between 6 and -10

C. 32 more than negative 38

Is he correct? Explain your answer.

R

8a. Hunter thinks that the number that lies halfway between A and B is -1.

Is he correct? Prove it.

R

8b. Annabel thinks that the number that lies halfway between A and B is 0.

Is she correct? Prove it.

R

9a. Josh had £10 in his bank account. On Tuesday, his gas, phone and water bills came out. His bank account is now -£28. If the water bill was £12 and the phone bill was £17, how much was Ben's electricity bill?

Use the number line below for support.

PS

9b. Chuan had £8 in his bank account. On Wednesday, he spent £16 and on Thursday, he spent £23. On Friday, he was refunded the money for a damaged top he'd returned. His bank balance is now -£13. How much was the refund?

Use the number line below for support.

PS

## Reasoning and Problem Solving Negative Numbers

### Developing

- 1a. Jo is incorrect because B should be pointing to -9.
- 2a. Arty is incorrect, as halfway between 4 and -6 is -1.
- 3a. -£8

### Expected

- 4a. Andy is incorrect because C should be pointing to -27.
- 5a. Hannah is incorrect, as halfway between 11 and -13 is -1.
- 6a. £19

### Greater Depth

- 7a. Ellie is incorrect because C should be pointing to -22.
- 8a. Hunter is incorrect, as halfway between 30 and -40 is -5.
- 9a. £9

## Reasoning and Problem Solving Negative Numbers

### Developing

- 1b. Bert is incorrect because A should be pointing to -6.
- 2b. Punita is incorrect, as halfway between 4 and -8 is -2.
- 3b. £15

### Expected

- 4b. Betty is incorrect because B should be pointing to -9.
- 5b. Avneet is incorrect, as halfway between 19 and -17 is 1.
- 6b. -£15

### Greater Depth

- 7b. Brian is incorrect because B should be pointing to 16.
- 8b. Annabel is incorrect, as halfway between 30 and -20 is 5.
- 9b. £18
